Advancing medicine through data-driven approaches.

First Author Nature Medicine Publication:	**Proficient with a diverse range of data:**	**Rapid Research Output:**
Developed a predictive model using smartwatch data to identify Parkinson's seven years before clinical diagnosis in the general population, outperforming existing markers.	Completed projects using data from genetics, biospecimen, brain imaging, digital sensors, clinical assessments, and EHRs.	Authored five first-author articles and contributed to three additional publications within three years.

Education

01/04/2021–04/25/2024 **Ph.D. passed without corrections**, *Cardiff University*,
Thesis: "Addressing Parkinson's Disease Risk Analysis, Early Diagnosis, Progression, and Stratification using Data-Driven Approaches in Deeply Phenotyped Cohorts" *Prof. Dr. Caleb Webber & Dr. Cynthia Sandor*,
Biomarkers, Machine Learning, High Performance Computing

- initiated projects on digital biomarkers leading to three publications
- compared risk prediction models based on biological, clinical, and digital data
- performed longitudinal data analysis with mixed models and assessed prognostic value
- conducted quantitative comparison of data-driven Parkinson's disease subtypes

10/01/2018–11/06/2020 **Cognitive Science M.Sc. first-class**, *University of Tübingen*,
Thesis: "Building a trajectory model of cognitive and motor aging: exploring predictors in large-scale, longitudinal data of elderly using machine learning techniques" *Prof. Dr. Philipp Berens & Dr. Fabian Sinz*,
Statistical and Probabilistic Machine Learning, Computational Psychiatry, Data Literacy

10/01/2015–09/26/2018 **Cognitive Science B.Sc. first-class**, *University of Osnabrück*,
Thesis: "Analyzing event-related potentials in 8-channel EEG data using machine learning methods" *Prof. Dr. Gordon Pipa & M.Sc. Olivera Stojanovic*,
Linear Algebra, Statistics, Algorithms and Data Structures, Neurobiology, Neuropsychology

10/01/2017–02/28/2018 Semester abroad with Erasmus at KU Leuven, Belgium.

Achievements

Awards
- runner-up for PGR student of the year 2023
- best talk award at UKDRI PD ECR meeting 2023
- runner-up for research proposal at UCL biomarker course 2022
- Master's thesis nominated for ILW Förderpreis 2020/21

Engagement
- invited talk at Parkinson's awareness Day 2023 and Wales RIG 2024
- newspaper and radio interviews including BBC news
- participated in Neurohack 2022 with a project on dementia diagnosis

Skills

Programming	python (pandas, scikit-learn, pytorch), R (lme4, brms), Matlab (SPM), git, bash
Domain Knowledge	Parkinson's disease, digital health technologies
Data Handling	digital sensors, brain imaging, genetics, electronic health records

Experience

09/03/2024–today **Postdoctoral Scholar**, *UCSF: Bakar Computational Health Sciences Institute*
electronic medical records, real-world evidence

07/01/2024–08/02/2024 **Research Associate**, *Imperial College London: Translational Machine Intelligence Lab*
digital risk score for Parkinson's disease, large language model for scientific publications

01/15/2024–06/30/2024 **Research Assistant**, *Imperial College London: Translational Machine Intelligence Lab*
digital risk score for Parkinson's disease, digital monitoring of non-motor symptoms

10/01/2019–04/30/2020 **Laboratory Internship**, *University of Tübingen: NeuroMADLAB*
performed a mega-analysis of resting-state fMRI data for depression classification.

03/01/2019–03/01/2020 **Research Assistant**, *University of Tübingen: Methods of Machine Learning*
prepared LaTeXscripts for two courses.

10/01/2016–04/01/2017 **Teaching Assistant**, *University of Osnabrück: Department of Computer Science*
tutored the course Algorithms and Data Structures.
